

PEST CONTROL AND USE OF PESTICIDES

The Greenwood Community School Corporation is committed to providing a safe environment for students. It seeks to prevent children from being exposed to pests and pesticides. While pesticides protect children from pests that may be found in the school and its surrounding grounds, under some circumstances, they may pose a hazard to children. Therefore, pest control practices may involve a variety of chemical and non-chemical methods that are designed to control pests effectively while minimizing potential pesticide exposure.

The Corporation will:

- a. annually inform parents and staff members of the Corporation's pest control policy at the time of student registration by a separate memorandum or as a provision in the staff and/or student handbook;
- b. provide the name and phone number of the person to contact for information regarding pest control;
- c. maintain a registry of parents, guardians, and staff members who want to receive advance notice of all pesticide use, and, provide such notice at the start of each school year and during the school year when a student enrolls in or transfers into a school;
- d. The Corporation's notice at the start of each school year shall invite parents, guardians, and staff members to be added to the pesticide notification list, and the Corporation shall permit a person to be added to the registry at any time upon their request.
- e. provide notice of planned pesticide applications to parents and employees who have requested advance notice;
- f. maintain written/printed/electronic records for two (2) years of any pesticide applications, and make these records available to anyone for inspection and copying upon request.

The Corporation will provide notice to those in the registry at least forty-eight (48) hours prior to the date and time the pesticide application is to occur unless an emergency is declared. The notice will include the date and time of the pesticide application, the general area where the pesticide is to be applied and the telephone number to contact for more information. In case of emergency pesticide applications, because of immediate threat to the public health, the school shall give written notice as soon as possible. The Corporation may provide for training of school employees to become certified pest control applicators. Financial support for such training may be provided by the Corporation subject to budgetary constraints of the Corporation. The Superintendent shall prepare administrative guidelines for the implementation of this policy. (I.C. 15-16-5, 357 IAC 1-16)

PESTICIDE NOTIFICATION REGISTRY

The State of Indiana has regulations that impact how school corporations may use pesticides on school grounds. Greenwood Community Schools follow these guidelines and we are inviting parents and guardians to voluntarily join our Pesticide Notification Registry. By signing up for this registry, you will be notified at least 48 hours prior to a pesticide application at your student's school. If you would like to participate, please complete the required information below and return this form to the school that your student attends:

This is a voluntary registry and not required for your child to attend our schools. Return this form to your child's front office. Only parents/students who return this form will be contacted.

Parent/Guardian Name: _____

Parent/Guardian Email Address: _____
